

PRAKTIK

kettle autoclave for crafts business

With the **VOSS PRAKTIK** kettle autoclave you can venture into food and pet food production, by making it possible to sterilise and pasteurise your packaged goods.

The **VOSS PRAKTIK** kettle autoclave is perfectly suited for farm shops, caterers and all producers, who are taking their first steps into legally compliant preservation of food products.

The corpus is completely fabricated from stainless steel and meets the hygienic requirements of all production sectors. The bevelled cover plate as well as transport wheels at the base plate ensure an optimum mobile work environment.
