

UNIVERSAL 1020

Our most optimal universal unit for crafts businesses and industry

VOSS UNIVERSAL units of the 1020 series help you ensure that your demanding customers will always remain satisfied customers. They assure that you can produce the same quality and quantity day by day.

With a **VOSS UNIVERSAL** unit of the 1020 series you produce with a stack length of 1,000 mm and a charging trolley height of 1,980 mm.

The work procedure that can be adapted accurately to each individual product, the integrated humidity control and the perfect smoke and air routing of the nozzle system produce convincing results in every batch.

The smoke is provided by an integrated, side-mounted or on-site smoke generator.

UNIVERSAL 1020

Our most optimal universal unit for crafts businesses and industry

VOSS UNIVERSAL units of the 1020 series offer you the possibility of selecting the energy type that is the most economical for you. The units can be heated electrically, with gas, oil, high pressure or low pressure steam.

VOSS UNIVERSAL units of the 1020 series provide you with the combination of dry and humidity heating with an air circulation system which is ideal in each case. Models HD and ND utilize the steam provided on site.

Models KWE, Ö and G use cold water atomization, and model E generates the humidity by an integrated live steam generator.

Standard equipment
